Social networking sites on society"

Computer Engineering Department
Wishes'
Happy New Year

FAREWELL PROGRAM

Department of Computer Engineering organised
"Farewell Program" to the third year students.

JSPM's Jayawantrao Sawant Polytechnic's Department of Computer Engineering organized "Farewell Function" for third year students. Farewell is a bittersweet occasion for both Teacher and Student gathering for the last time in an event after which both students and teachers will bid goodbye to each other is mean to be full of emotions. Different Kinds of awards were given to the students on this occasion. Awards like Best Anchor, Best Student, and Best sports person were there. Students express their gratitude towards college and faculty members. HOD of Computer Engineering Department Mr.M.S.Kalbande, Faculty members Mrs.S.N.Thorat, Mrs,S.S.Sajjade and Mrs.K.M.Shirole shared their views. Video memory of the students also showed on this occasion.

COMPUTER ENGINEERING DEPARTMENT

VISION

To build creative programming mind in the students for adopting emerging technology in the field of computing, for the betterment of society.

MISSION

M1: To impart sound theoretical and practical knowledge in the disciplines of computing, through effective teaching learning process.

M2: To produce industry and society oriented skillful engineers through co-curricular and extra-curricular activities.

M3. To inculcate ethical values in the students.

(Prof.Dr.S.M.Deokar)

It gives me immense pleasure to introduce this issue of MSBTE Newsletter to our esteemed readers. This issue is on a topic of mass interest for the young, youth, grownup and the old. It highlights the thoughts, views on theme “Impact of Social Networking & Social Networking Sites on Society”.

Social networking affects our lives in many ways, including our communication, self- expression, bullying, isolations, friendships, and even our sense of humanity. On these networking sites, users normally create pages & post pictures of themselves and their friends who in turn comment on these photos. This concept seems simple enough, but its use is very different and user age dependent.

The impact of social networks on the young is considerably significant. Children are up with mobile devices and interactive social networking sites which has made the social media a vital aspect of their life. Social network is transforming the way in which young people interact with their parents, peers, as well as how they make use of technology.

Online social networks focus on building and reflecting social relationships among people who share interests and activities. The ability of social media sites to spread information beyond the capacity of traditional digital media makes them attractive tools for business organizations and individual professionals.

Before the advent of these sites people used communication strategies like newsletters and gossip to discuss about their past and present acquaintances. Social networking sites have enabled status messages and regular updates that enable people to engage in substantial lightweight social surveillance.

Today, social media is about the new Cs: creativity, connection, communication, creation of new ideas and products, culture, community of shared interests, collaboration and the changing the game of competition. Thus, does social networking make us better or worse off as a society?

Social media is ballast to the ongoing deflation of human lives. Social media’s rapid augmentation is a garish, frantic, incipient attempt by people universally to connect with each other in the aspect of all the hindrances that innovation imposes on us: suburbanization that quarantines us from each other, long haul of hours of work and commutes essential to make ends meet, the global scattering of families, and, not the least, the television - the ultimate alienation machine. The social web and mobile technologies have fast-tracked the rate at which interactions develop, information is shared and influence takes a footing.

Teenagers, however, use this new technology in a way that could be dangerous. In this stage of their lives, they care more about their need to impress their peers than mature reasoning.

Social networking therefore has insightful influences on human society that are both beneficial as well as detrimental. The effects of social networking are twofold. Social networks can act as invaluable tools for professionals. They achieve this by assisting young professionals to market their skills and seek business opportunities. Social media offer a handy, widely available means for a bi-directional flow of information between the public and the authorities. The different social media channels have become an integral tool in the response of official authorities and the general public to emergency situations. Social media networks are the new ‘milk-cartons’ in helping to trace missing people. When natural disaster strikes and causes devastating destruction, social media is the ideal vehicle to deliver messages asking for support. Hash tags are created to help net users locate related stories and show their support for those affected by the disaster.

Mr.M.S.Kalbande
(Vice Principal)

I have accounts on several social network sites and spend a considerable time on posting updates and reading and appreciating other people's posts. I enjoy doing so because in that way I can keep in touch with a lot many friends. Know what they are up to, see their pictures with friends and families and also keep in touch with a long lost school / college friends or distant relatives. Also I can see wonderful pictures and read good thoughts or opinions posted by friends. But is that all?

With social media the businesses can connect with their targeted customers for free within a fraction of a second, the only cost is energy and time. Social sites have also become the most viable and cost effective communication choice for the bloggers, article writers and content creators. Students and experts are able to share and communicate with like-minded people and can ask for the input and opinion on a particular topic.

Faculty Speaks.....

Mrs.S.N.Thorat
(Lecturer in English)

Man needs to interact, share ideas, thoughts, emotions and disseminate information with the people and get love, belongingness and recognition in the society. With the advent of social networking sites (SNS), from a small child to professionals, all are able to develop and maintain contacts and communicate with like-minded people not only in real world but also in virtual world. It is observed that teens use Face book the maximum for their studies, entertainment and also to kill the time.

Also another advantage of social network sites is that it gives a huge platform for people to unite on a social problem or an issue concerning public at large. Creating awareness about a social issue has become so much simpler and faster.

However, social networking sites aren't a wholly positive influence on the world. In fact, if you delve just a little into how they have changed the world, you find there are some potentially negative impacts that these sites have on society as a whole and each of us as individuals.

This is perhaps the biggest impact for the worse that social networking as a whole is having on society. The very concept of privacy seems to be inexorably eroding, and at a fantastic pace. Those of us who are connected to the Internet are connected 24/7, and we have immersed ourselves in an extension of society in which privacy is not treated with the high regard. Many of us share personal information asked by a site. Even with the tight security settings your personal information may leak on the social sites. Downloading your videos or pictures and copying your status is an easy task and can be done within few clicks. be misused by miscreants to dupe us.

Due to time constraint, professionals like politicians, scientists, teachers, businessmen etc. can reach the public of their interest through twitter, blogs in a fraction of the second to convey and discuss the events, creative ideas, suggestions, etc. The exchange of information, skills through SNS not only saves the time but also increases the productivity and helps in the progress of the society. The best example is our Hon'ble PM Shri Narendra Modi who is reaching out to the people through twitter to convey upcoming projects, growth of India as well as for greetings. Although SNS is a powerful technology and is a boon to the society, it becomes a bane if not used wisely. The youths are becoming victims of SNS because of their haste and unmindful actions. For want of quick recognition and increasing their friends list, people accept and post their personal data danger.

Faculty Speaks.....**Mrs.A.R.Mohite****(Lecturer in Computer Engineering Department)**

Social Networking Sites are the internet-based social spaces designed to facilitate communication, collaboration & content sharing across networks of contacts. They are simple online services helping people to manage, build & represent themselves on the newer heights. It also helps people to learn something new daily & get updated with news from all over.

The most important thing about Social Networking Sites is that happenings are so fast that success or failure is bound to stay with you for a while. It doesn't give you time even to catch yourself before you fall. Some say it's all about gaining the attraction of people but getting addicted to such those activities can move them to instant failure which will be difficult to deal with or just stop the life as no more the key of life will be on the hand of a person.

**Mrs.K.M.Shirole****(Lecturer in Computer Engineering Department)**

I have accounts on several social networking sites, and spend far too long on them writing my own updates and reading the updates of others. I enjoy doing so, being able to interact online in a controlled environment. Social networking has lots of good points, one can express oneself, showing off favorite song lyrics or posting pictures of new outfit. It is a lot harder to feel embarrassment over the internet than in person, so people find it easier to vent their feelings on sites. It also makes it a lot easier to keep in touch with family and friends, especially if they live far away.

Not everyone in the 21st century thinks about the negative effects of having social networking accounts - but simple things like not setting your privacy settings properly

Students Speaks.....**(Ishwari Shendkar TYCO-1)**

Through Social Networking people can use networks of online friends and group memberships to keep in touch with current friends, reconnect with old friends and create virtual friendship. Sharing same interests and views, discussion on database topics, news articles are the most common topics on these Social Networking Sites. In addition to blogs and forum, members can express themselves by designing their profile page to reflect their personality. Today many employers look online profile before giving the job offer.

**(Vasudha Kale SYCO-2)**

There are uncountable advantages and disadvantages of Social Networking Sites such as, we have to express our thoughts about any incident or any political decision we can express on tweeter and people read it and appreciate our thinking. It is very popular, cost free and interesting way to express our thoughts. Youngsters are attracted to Facebook and What Sapp which increase day by day. We can make friends & can talk to any person living abroad and get information about place.

Departmental News.....

INDUSTRIAL VISIT

Department of Computer Engineering organized Industrial visit at The National PARAM Supercomputing Facility (NPSF), Center for Development of Advanced Computing C-DAC Innovation Park for the third year students.

Department of Computer Engineering organized Industrial visit at The National PARAM Supercomputing Facility (NPSF), Center for Development of Advanced Computing C-DAC Innovation Park for the second year students.

FACULTY DEVELOPMENT PROGRAM

Computer Engineering Department organized faculty development program on “Role of Teacher” for all the faculty members of department. It enhances teaching skills of faculty members.

WOMEN'S DAY CELEBRATION

Department of Computer Engineering celebrates “Women’s Day”. On this occasion Mrs.Sonalika Sathe (PSI Wanowari) invited as a chief guest for this function.

NDA VISIT

**Department of Computer Engineering organized visit at NDA,Khadakwasala,Pune.
for the second year students.**

PERSONALITY DEVELOPMENT PROGRAM

Department of Computer Engineering organized “Personality development and interview techniques program” for the third year students. Mr.Bapu Arkas(RPA Manager of ProAzure Software Solutions Pvt.Ltd.) was the chief guest for this program.

SEMINAR ON EDE

Department of Computer Engineering organized the Seminar on “Entrepreneurship Development” on the 10th of March 2023. Ganesh Thorat was the Guest of this Seminar. He is the younger Entrepreneur a mechanical engineer. He is interested in the field of Drones,UAVs and mechatronics.

EDE EXHIBITION

Department of Computer Engineering organized the Exhibition on “Entrepreneurship Development” to enhance the skills of entrepreneur in the students.

EXPERT LECTURE

Computer Engineering Department organized the Expert Lecture on Android Application and Web Development on 7 April 2023. From this Expert Lecture students grabbed the knowledge about Android Application and Web Development.

SHIVJAYANTI CELEBRATION

Department of Computer Engineering celebrated "Shivjayanti 2023". On this occasion all staff members and students worshipped Shivaji Maharaj.

Department of Computer Engineering organized the Webinar on “How to write a Journal paper”. Dr.R.Sugumar was the Chief Guest of this Webinar. He is the Professor, Dept.of CSE Saveetha Institute of Medical and Technical Sciences.

PROJECT EXHIBITION

Computer Engineering Department organized “Project Exhibition” of the third year students. All students showed hard work and dedication to their projects.

SUMMER CAMP

Department of Computer Engineering organized “Summer Camp” for the 10th std students. Prof. M.S. Kalbande and Prof. S.N. Thorat delivered career guidance speech to guide these students.

**Vice Principal
(Mr. M.S. Kalbande)**
